Brilla

Technology infrastructure. Delivered worldwide.

Data centers · Servers & computing · Networks & telecom · Satellite · Security · Software licensing

COMPANY PROFILE 2026

USA · SAUDI ARABIA · EUROPE · ASIA

WHO WE ARE

An international technology partner with 20+ years of expertise

Brilla is an IT infrastructure, supply and integration company serving enterprise, government, education and commercial clients across the United States and the Middle East. We source and deliver the full technology stack — from data center infrastructure, servers and telecom equipment to software licenses, drones and robotics — and design, install and support the systems that run on it.

20+

Years of expertise

Networks, computing & systems integration

3

Continents

Americas, Middle East & Asia, Europe

360°

End-to-end delivery

Sourcing, design, installation, support

1

Point of contact

For every vendor, product and project

GLOBAL REACH

Global sourcing. Local delivery.

A supplier network spanning the Americas, Europe and Asia lets us source the right equipment at the right cost — and deliver it on site.

United States

Headquarters, operations across the Mid-Atlantic and Northeast

Saudi Arabia & GCC

Supply and project delivery for enterprise and government

Europe

Vendor partnerships and specialist equipment sourcing

Asia

Manufacturer and supply-chain partners for hardware

MISSION & VISION

Our mission

- 100% customer satisfaction through innovative, quality, on-time products and services
- Practical, cost-effective solutions built with strong technical and problem-solving ability
- Lasting relationships grounded in courtesy, integrity and professionalism

Our vision

- To be a leading international supplier of information technology infrastructure
- To be the trusted single point of contact for building and upgrading business technology
- To be a respected employer where talented people want to grow

WHAT WE DELIVER

One partner for the entire technology stack

Data Center Infrastructure
Racks, power, cooling, cabling & DCIM

Servers & Computing
Servers, workstations, PCs & peripherals

Networking & Telecom
LAN/WAN, wireless, routing & telecom gear

Satellite Communications
VSAT, satellite terminals & phones

Cloud & Storage
Cloud storage, NAS/SAN, backup & DR

Security & Surveillance
IP/CCTV, thermal, LPR & facial recognition

Access Control & AV
Biometrics, controllers, displays & AV

Drones & Robotics
Enterprise drones and robotic platforms

Software Licensing
Genuine licenses & cloud subscriptions

INFRASTRUCTURE SUPPLY

Everything a modern data center needs

We supply and integrate the complete infrastructure for data centers, server rooms and data rooms — sourced from leading global manufacturers.

- Racks, enclosures & containment
- UPS, PDUs, power & precision cooling
- Structured cabling, fiber & patching
- Servers, storage & backup systems
- Core switching, routing & firewalls
- Monitoring, DCIM & environmental sensors

EQUIPMENT & COMMUNICATIONS

Computing, telecom and space-grade connectivity

Servers & Computers

- Rack, tower & blade servers
- GPU & AI workstations
- Desktops, laptops & thin clients
- Displays & peripherals

Communications & Telecom

- Switches, routers & firewalls
- Enterprise Wi-Fi & radio links
- IP telephony & unified comms
- Fiber & transmission equipment

Satellite Communications

- VSAT & ground terminals
- LEO / GEO satellite internet
- Satellite phones & IoT
- Remote & field connectivity

Cloud & Storage

- Cloud storage subscriptions
- NAS, SAN & object storage
- Backup & disaster recovery
- Hybrid cloud integration

EMERGING TECHNOLOGIES

Drones and robotics for enterprise and government

Drones

Enterprise UAV platforms, payloads and accessories for field operations.

- Inspection
- Mapping & survey
- Security patrol
- Thermal imaging

Robotics

Robotic systems that automate inspection, security, logistics and learning.

- Inspection robots
- Service & delivery
- Industrial automation
- Education & R&D

DATA NETWORKS

From design to day-two operations

Our engineers design, build and manage business networks end to end — for offices, campuses, retail centers and data centers.

01

Design

Assessment, architecture & documentation

02

Implementation

LAN, WAN & data center networks

03

Wireless

Enterprise Wi-Fi & wireless bridges

04

Cabling

Copper & fiber structured cabling

05

Management

Monitoring, maintenance & support

06

Testing

Certification & performance testing

SECURITY & LOW-VOLTAGE SYSTEMS

Protect, control and connect every site

Surveillance

- IP & CCTV HD cameras
- PTZ, starlight & multisensor
- Thermal & LPR cameras
- Facial recognition & analytics
- Vandal-resistant enclosures

Access Control

- Standalone access control
- Access control platforms
- Controllers & sub-panels
- Biometric readers
- Visitor & door management

Audio Visual

- Video displays & video walls
- Meeting & conference rooms
- Surround & public address
- Indoor & outdoor displays
- Control & signal distribution

SOFTWARE LICENSING

Software from the world's leading publishers

Genuine volume, enterprise and cloud subscriptions for management, project management, design, office productivity and cloud storage — with deployment support and renewal tracking.

Microsoft
Office, Windows & Azure

Adobe
Creative & document cloud

Autodesk
AutoCAD, Revit & BIM

Oracle
Database & Primavera

SAP
Enterprise resource planning

Salesforce
CRM & customer platforms

Atlassian
Jira & Confluence

Google Workspace
Office & collaboration

Dropbox
Cloud storage & sharing

Zoom
Meetings & communications

WORLDWIDE SUPPLIER NETWORK

Brands we source and supply

Long-standing relationships with distributors and suppliers across the US, Europe and Asia.

WHY BRILLA

Total customer satisfaction is the standard we hold

Quality as a commitment

Products and services that impress, are easy to use and are built to last.

A sense of urgency

A responsive team recognized for speed and quality of service.

Cost-effective choices

We help clients choose the right solution at the lowest total cost.

Support start to finish

Experts who design, build and manage your systems end to end.

Brilla

Let’s build your infrastructure together.
